Your Medical Gas Fittings Specialist™

Our new tag line says it all!

We have recently adopted a tag line, which we believe describes the role we serve in the medical gas marketplace.

Let's break it down and show you what we mean.

Your. In our eyes, business is personal and we want you to feel special when you work with our company. Whether you are talking with one of our sales, customer service or engineering team members, we all recognize that your needs are unique and require specific, individual attention. We aim to make each experience like you are talking with someone who is on your side.

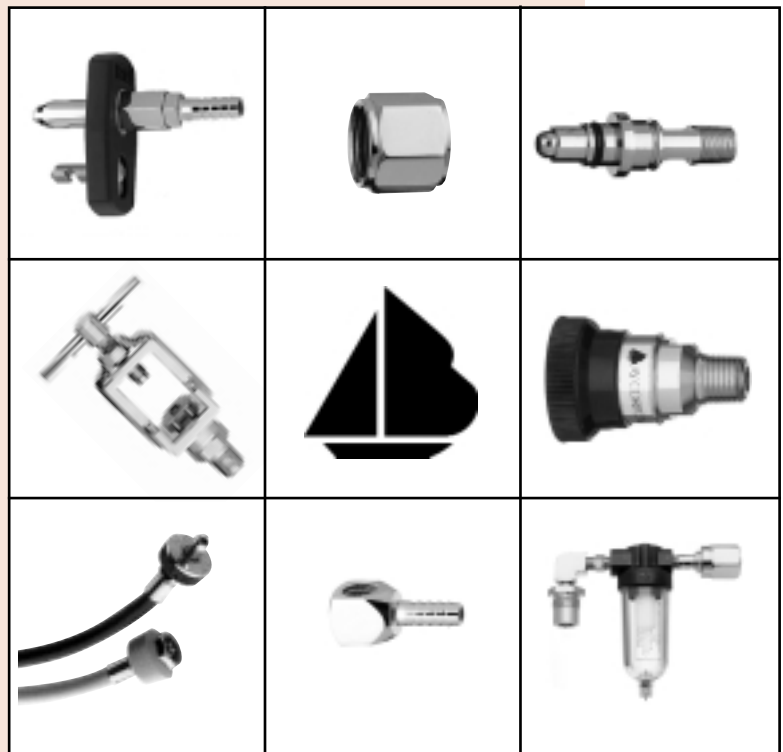

Medical Gas Fittings. Bay Corporation manufactures medical gas fittings and only medical gas fittings. We do not have competing product lines for manufacturing processes, which could possibly affect lead times, quality and/or resources. As a result, we can focus on what our customers need - - - high quality products; quick, off-the-shelf delivery; and value pricing.

In addition, we offer the most comprehensive line of medical gas fittings in the marketplace. Our most up-to-date product listing can always be found on our website: www.baycorporation.com.

Specialist. Not only do we specialize in medical

gas fittings, but our team of professionals is the most experienced in the industry. Our management team has well over a combined 100 years of experience in the medical gas industry. Our customers and endusers alike recognize our expertise and often call on us for assistance. In fact, a few years ago, one of our customers labeled us as their "Medical Gas Fittings Specialist."

And we want you to know that we are yours too!
